SUMMARY

Computer Science graduate eager to contribute to projects in the Computer Science and IT industry. Completed several mini-projects and roles, including building web apps and working across frontend, backend, and full-stack development using Laravel, Vue, and MySQL.

SKILLS

JavaScript, Vue.js, Laravel, MySQL, Python, HTML/CSS, Tailwind CSS, RESTful APIs, PHP, Node.js, React, Express, Bootstrap, Figma, Git, GitHub, Photoshop

EDUCATION

Visayas State University Main Campus   **Sep 2021 - Jul 2025**
Bachelor of Science in Computer Science   Baybay, Leyte, PH

Ormoc City Senior High School   **Aug 2015 - Aug 2019**
Science, Technology, Engineering, and Mathematics Strand   Ormoc, Leyte, PH

EXPERIENCE

Intern Full Stack Developer   **Jun 2024 - Aug 2024**
Wela School Systems

- Enabled dynamic certificate generation by creating a **Frappe Print Format** with editable fields using **JavaScript** and **HTML/CSS**.
- Improved reporting efficiency for MV Gallego Colleges and Chime Learning School by building custom script reports using **Python** and **Jinja** templates.
- Streamlined academic performance tracking through report card formats, leveraging **Frappe's templating engine** and client-side scripting using **JavaScript**.
- Adapted core systems by customizing **Frappe DocTypes** and integrating server-side logic with **Python**, ensuring compatibility with unique school workflows and data.
- Accelerated data access and system responsiveness through optimized **Python** scripts within the **Frappe Framework** for seamless querying.
- Maintained code integrity and streamlined collaboration using **Git** and **GitHub** for version control and team-based deployment.
- Empowered school staff with clear, concise technical documentation using **Markdown** and **HTML**, reducing training overhead and improving feature.

PROJECTS

Pageant Scoring System - Built a custom scoring platform for Visayas State University pageants, achieving a 4.55/5 system evaluation, using **JavaScript**, **Vue.js** and **Laravel**.

File Management Application - Created a mini file management website application that handles single file upload with **React**, **Multer**, **Express.js**, and **Tailwind CSS**.

Person Search System - Built a frontend web app with live **JSON** search using **jQuery**, **HTML**, **CSS**, and **JavaScript**.

Revenue and Attendance Management System - Developed a polished mockup to improve the UI/UX of Visayas State University's previous Attendance Management System, designed with **Figma** and **Photoshop**.
